to see that ui is up
and running.

```
hacker@Ultrabook: /mnt/d/code
hacker@Ultrabook:/mnt/d/code$ python3 main.py
Scheduler started
* Serving Flask app "main" (lazy loading)
* Environment: production
  WARNING: This is a development server. Do not use it in a production deployment.
  Use a production WSGI server instead.
* Debug mode: on
* Running on http://127.0.0.1:5001/ (Press CTRL+C to quit)
* Restarting with stat
Scheduler started
* Debugger is active!
* Debugger PIN: 109-891-084
```

Prediction

Enter absolute file path.

Custom File Predict

Or

Default File Predict

Results

Using UI

Insert Prediction Batch file

Insert input files in
Prediction_Batch_files
folder

File Format :-

fraudDetection_LengthofDateStampInFile
_LengthofTimeStampInFile.csv

Prediction Results

Insert absolute file path
[Prediction_Batch_files
location] on UI.

Click on Custom File
Predict

You can see results at
Prediction_output_File/pre
dictions.csv !!!
